

The background of the slide is a photograph of two surgeons in an operating room. They are wearing blue surgical gowns, blue bouffant hairnets, and white surgical masks. The surgeon on the right is looking down, while the surgeon on the left is partially visible. A large red rectangular overlay is positioned in the center-left of the image, containing white text. A small red square is located at the bottom left of the red overlay.

Aortic and Mitral Highlights

Two advanced courses that will provide a broad overview of the latest trends to treat valvular diseases: the first course will be dedicated to aortic surgery and the second one to mitral and tricuspid surgery.

These two-day round-table discussions will allow top international leaders to explore, and debate the latest hot research topics and key studies in the field of cardiac surgery.

This is an excellent opportunity for cardiac surgeons who regularly perform aortic and/or mitral valve surgery to interact with recognized experts and attend short academic presentations, live-in-a-box sessions, and patient case discussions to maintain their knowledge and skills at a very high level.

Target audience

Cardiac surgeons with established valve replacement practices on a yearly basis and willingness to improve their knowledge by interacting with international experts. A limited number of spaces will be available for on-site participation. Access to online participation is free.

European Fellows Conference

This on-site course is a unique opportunity for young residents and fellows to meet international leaders in cardiac surgery and review essential theoretical knowledge as well as to learn about latest and future innovations that will enable them to become the experts of tomorrow.

Presentations, roundtables and hands-on training will also give participants the opportunity to learn more about Edwards Lifesciences' contribution to the fight against cardiovascular disease, particularly from an educational perspective.

Target audience

Cardiac surgeons who are at the beginning of their career, and willing to consolidate their knowledge with exposure to international faculty. Acceptance based on committee review. The course will not be broadcast online.

Global Fellows Program

European fellows training is a unique opportunity for European, American and Canadian surgeons to meet and exchange on their practices, while learning from leaders' key considerations regarding the treatment of valve disorders. This course explores a wide spectrum of topics related to valve diseases and involves academic presentations, workshops, and wet labs. It is also a good opportunity to discover Edwards' latest innovations to treat valvular diseases.

Target audience

Cardiac surgeons who are at the beginning of their career, and who are willing to consolidate their knowledge with exposure to international faculty. Acceptance based on committee review. The participants will travel to Irvine, California.

Mitral & Aortic Immersive Course

This advanced course focuses on the latest trends in surgical techniques and approaches to treat mitral, aortic, and tricuspid valve diseases and is presented in a highly immersive manner with live surgical procedures as well as interactive live in box sessions and patient case discussions to allow analysis of complex cases.

All key topics will be covered, from the most basic to the highly complex, including surgical procedures and access, minimally invasive techniques, and patient management.

Target audience

Cardiac surgeons with established valve replacement practices and who are willing to improve their knowledge and interact with International experts.

Female Surgeon Conference

This special course will focus on the latest trends and innovations in the treatment of valvular diseases through academic presentations, and clinical case discussions.

A special emphasis will be placed on interaction and debate between participants. It is a good opportunity for female surgeons to share common experiences, interests and concerns in the field of cardiac surgery in order to achieve their professional goals and become the leaders of tomorrow.

Target audience

Female cardiac surgeons with established valve replacement practices who are willing to both improve their knowledge and develop their networks by interacting with European experts.

European-based congresses

2023

HVS 2023

March 29th – April 1st

Location:
Málaga, ES

The 37th EACTS Annual Meeting

October 4th – 7th

Location:
Vienna, AT

More information will be communicated throughout the year on the Edwards Masters website about national symposium organized by Edwards Lifesciences.

Edwards Masters Educational platform

As part of the learning programs, Edwards Masters is the educational platform of reference for cardiac surgeons.

Through high-end content, we aim to provide the community with the best tool to treat patients: education. In order to achieve this goal, we will provide educational content in a variety of formats, appropriately customized for each member of the community.

Depending on their educational needs, each user will be able to follow, at their own pace, high quality learning paths on various topics, and find a large selection of scientific resources, such as case studies, best practices from opinion leaders, and more.

New content will be regularly published in order to stay up to date with the **latest key topics** in the field of valve surgery as well as **upcoming educational events**.
