

# Mitral Highlights Course: June 5-6, 2023

## Official letter from the course directors

Dear Colleagues,

On behalf of Edwards Lifesciences and our fellow speakers, we are pleased to invite you to take part in the upcoming Hybrid **Mitral Highlights Course** that will be held on **June 5-6, 2023**. This new course will be entirely dedicated to the hot topics and the latest research surrounding the treatment of mitral valve disease. More precisely, the course will include unique sessions that will cover:

- The latest trends in the management of primary mitral regurgitation, where we will explore the process of choosing the correct surgical strategies for different patients
- Concomitant and isolated tricuspid valve repair, including beating heart tricuspid valve repair
- Systolic anterior motion assessment, avoidance, and treatment
- The science behind annuloplasty rings
- A look into the future of mitral valve therapies
- Recent scientific evidence regarding mitral repair and replacement, with a focus on pushing the limits and current boundaries
- The role of gender in mitral valve disease treatment
- A selection of other topics that invite the faculty and the audience to discuss and debate on current hot topics in mitral valve treatment

Throughout the course, you will not only have the privilege of learning from some of Europe's leading experts in mitral valve surgery, but you will also have the chance to directly interact with the faculty via Q&A sessions. All the experts will be mobilized in a professional TV studio, where a number of digital features will be included so you can fully enjoy the experience, whether you participate online or in-person.

Whether in-person or online, we look forward to answering your questions and bringing the most up-to-date scientific information straight to you.

Sincerely,

**Nikolaos Bonaros,**  
Medical University of  
Innsbruck

**Victoria Delgado,**  
Hospital Germans  
Trias i Pujol
