

Remote Clinical Education

Experiencing the operating room
has never been so easy.

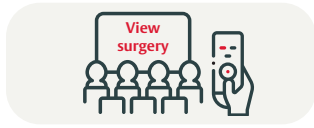

Edwards

Remote Clinical Education Technology

Remote Case Observation:

Exposure to state-of-the-art clinical practice

Remote Case Support:

An expert on your shoulder

Remote support technology captures and transmits immersive video sessions from the OR, enabling you to connect digitally with proctors all over Europe.

Clinical Training Pathway with Remote Education

1 Preliminary Activities

Live webinars and case observation for first insights of the practice

2 In-person training

Case observation, Proctorship and Centers of Excellence to learn from experts and peers

3 Follow-Up

1:1 Case support and observation to facilitate procedure adoption
